down and street out comfortably in all directions,
tall enough for them to stand up on their backlegs
tall enough for them to stand up on their backlegs
without their arest storching the top, and long
canough to allow at least three hops. A suggested
minimum size for most rabbits is 6ft x 2ft x 2ft high.
"Rabbits also need an exercise run as well as
their hatch. A large run on a gressy area will holp
ensure they get enough exercise. This must be
essure they get enough exercise. This must be
essure they are from predictors and offer some
shade for maximum rabbit safely. They also need
andoor run is cold weather theadly, their run
about the starched to the nuch so had the rabbits
on exercise whenever they want to."

are a problem and far-ten auternauve uncaterpillars that come either live or in a dy form and can be storred easily and dispensed in feeders. Meanforms can also be added to stort and far balls for better protein levels.
